Work Experience

January 2024 - Present

Kultstätte 58 GmbH, Freelance Contract

Full-stack Developer

- Efficiently enhancing and optimising the appearance of www.zirkusmond.de, a theater in Berlin, using TailwindCSS and Flexbox on a Django back-end.
- Improved site performance and reliability by successfully migrating the database from SQLite to Postgress.
- Improved user experience by providing an additional payment method with Stripe.

October 2023 - February 2024

Recruit.Bio, Freelance Contract

Front-end Developer

- Efficiently translated intricate Figma high-fidelity wireframes into a fully functional pre-release website with Next.js and Tailwind, for a specialized job-board in the biotech sector.
- Implemented Docker for streamlined workflow and a CI-CD pipeline using Github Actions.
- Created vibrant and reusable SVG components to provide a modifiable site background.

October 2014 - August 2023

Freelance performance artist

- Created a compelling repertoire of performance pieces, showcasing a range of lengths and styles, including contemporary circus, theatre, and mime. Performed in various prestigious venues and festivals across Europe and Asia.

Personal Projects

December 2023-February 2024

AI-Gram

[View the Github repository](#)

[View the site live](#)

- Successfully built text-to-image AI generation app using DeepAI's API and NextJS.
- Provided an aesthetically pleasing and fully functional image gallery.
- Implemented robust and reliable data storage with Google Firebase.

March-September 2023

Fletnix Movie Library

[View the Github repository](#)

[View the site live](#)

- Created two aesthetic & user-friendly, single-page front-end applications using React and Angular, as well as a NodeJS back-end, enabling users to create accounts, browse movies, and save their favourite selections.
